Percentage: 68.6%

Summary

A Passionate Student with a Dynamic Skill Set looking for Employment. Technologically Adept, good knowledge of core computer Science concepts such as Data Structures and Algorithms, Digital Logic, Computational Theory, Python, SQL, Java, C/C++. Knowledge and Prior working experience in an Office/Administrative Environment.

Project Work

Project Name Space Shooter Blitz
Role Full Stack
Technologies Used Python, PyGame, Turtle Module and OS Module
Space Shooter Blitz is a simple two player retro arcade type shooting game inspired from Cinematic classic title Star Trek. The main objective was to learn PyGame and Functions in python while keeping the learning process more interactive by creating a fun little project.

Project Name Apollo Connect
Role Full Stack
Technologies Used ASP.NET using C#, HTML & CSS, Microsoft SQL Server.
A User-Friendly Interface to Insert, Update, Delete & Manipulate Data in a Database. It is a dynamic Web Application developed using ASP.NET using C# with main objective of learning the basic concepts of ASP.NET with a practical approach.

Project Name Portfolio98
Role Front End
Technologies Used HTML, CSS & JavaScript
Link cosmicalotaku.github.io/Portfolio98
A windows 98 themed personal portfolio based on vanilla HTML, CSS and JavaScript.
This project was aimed at learning to create responsive webpages using CSS media queries and JavaScript.

Work Experience

Technical Recruiter

Outline Systems India

Nov. 2021 – Sep. 2022

Worked as a Technical Recruiter and filled various STEAM field positions. This position included sourcing talent from job boards for various positions by US Federal, State and Commercial Clients via emails and cold Calls, assisting prospective candidates and handling their queries regarding the job and assisting interested candidates on every step of recruitment cycle. Also maintained a network of prospective candidates via LinkedIn.
